

The EM Radiation Research Trust  
Charity  
Chairman Mr. Brian Stein CBE,  
Chetwode House, Leicester Road,  
Melton Mowbray,  
Leicestershire LE13 1GA

15<sup>th</sup> August 2023

A **FAKE NEWS** article was brought to the attention of the EM Radiation Research Trust claiming Russia was destroying 5G masts due to health concerns with an alarming headline saying: 'Putin Bans 5G across Russia, Destroys All Towers' .

<https://realrawnews.com/2023/08/putin-bans-5g-across-russia-destroys-all-towers/>

**How can Russia destroy 5G masts when they do not exist in Russia at this moment in time?**

The EM Radiation Research Trust dismissed this news as fake news and contacted the Chairman of Russia's National Committee on Non-Ionizing Radiation Protection to receive confirmation.

The **EM Radiation Research Trust** has now received information directly from Dr Oleg Grigoriev, Chairman, Russian National Committee on Non-Ionizing Radiation Protection regarding the official position on EMF/RF & 4G and 5G. He confirmed that the article on claiming the destruction of 5G masts in Russia is **FAKE NEWS**. This news report has **NOT** been issued by Russia. Dr Grigoriev provided details with regards to the latest position for RF/EMF radiation in Russia as follows:

- 1) Base stations banned in schools (building and territory) and any children's organization, such as children gardens & summer camps.
- 2) WiFi limits for elementary school classes with limited distance for all (minimum 5 m).
- 3) Mobile communication devices banned in schools too - but only during the teaching process.
- 4) Russia has government Sanitary rules for schools and are currently working towards new methodical instruction for digital education classes...
- 5) The Russian Government has a "road map" for 4/5/6G leading up to 2030. The Russian emf limits are under pressure but remain low at this moment in time.

With thanks to Dr Grigoriev for clarifying this situation.
